BEFORE CONGRESS.

To-Day's Report of the Majority of Ways and Means Committee.

PRESENT BILL NOT PERFECT.

The bill on which the Committee has expended much patient and anxious labor is not offered as a complete response to the mandate of the American people. It no more professes to be purged of all protection than to be free of all error in its complex and manifold details.

However, we may deny the existence of any legislative pledge, or of the right of any Congress to make such pledge for the continuance of duties that carry with them more or less acknowledged protection, we must recognize that great interests do exist whose existence and prosperity it is no part of our reform either to imperil or to curtail.

We believe, and we have the warrant of our own past experience for believing, that reduction of duties will not injure, but give more abundant life to all our great manufacturing industries, however much they may dread the change.

TEMPERATE REFORM SAFEST.

TEMPERATE REFORM SAFEST

In dealing with the Tariff question, as with every other long-standing abuse that has interwoven itself with our social or industrial system, the legislator must always remember that, in the beginning, temperate reform is safest, having in itself the principle of growth.

ing in itself the principle of growth.

PROTECTION'S FAILURES.

A glance at the tariff legislation of our own country ought to satisfy every intelligent student that protection has always shown its falsity as a system of economy by its absolute failure to insure healthy and stable prosperity to manufactures.

It teaches men to depend on artificial help, on laws taxing their countrymen for prosperity in business, rather than upon their own skill and effort. Iti throws business out of its natural channesi into artificial channels, where there must always be fluctuation and uncertainty, and it makes a tariff system the football of party politics, and the stake of every popular election.

None have recognized this truth more fully than the wiser men who from time to time have engaged in the so-called protected industries.

Years ago Edward Everett stated, in an oration at Lowell, that the sagacious men who founded the manufactures of New England were never friends of a high tariff policy.

Hon. Amass Walker, a former member of this House from Massachusetts, and one of our foremost writers on economic questions, declared it to be within his own personal knowledge that when the proposal was made to impose the protective tariff of 1816, the leading manufacturem of Rhode Island, among whom was Mr. Slater, the father of cotton spinning in this country, met at the counting-room of one of their number, and after deliberate consultation, came unanimously to the conclusion that they had rather be let alone, as their business had grown up naturally and succeeded well, and they felt confident of its continued prosperity, if let alone by Government.

They argue that by laying a protective tariff, their business would be

Justice Grady in the Yorkville Police Court to-day committed two wifebeaters to the Island. "This injunction," said Mr. Troy, "was issued on an affidavit Nov. 4, which says the defendant, McKane, had said he would interfere with watchers who were not residents of the town.

"That alone shows that the proper course for the plaintiff would have been to apply for a mandamus. Why, the evil—if there was an evil—could have been prevented by a mandamus. They can't come in at the last minute and say that there was no other remedy except an injunction."

Justice Cullen here interrupted Mr.
Troy.
"Of course," said the Court, "Judges
very often make mistakes, but it seems
to me that a mandamus in this case
would hardly serve the purpose. Go
on with your argument, Mr. Troy."
Ex-Judge Troy then attacked the
watchers sent down by Mr. Gaynor. He
asked the Court if it could be reasonable
to suppose that there was none in the
town who could be trusted to act as
watchers, as was charged in the affidavits upon which the injunction was issued.
"For this reason, in order to support
this allegation," said Mr. Troy, "we
claim that they sent down a body of
armed men."
In concluding his argument Mr. Troy
said:
"These are the points we make: There
was no violation of the injunction; the
Court had no jurisdiction over this case;
the relief asked for could never be

Justice Cullen interrupted Mr. Shepard and to say:

"The question is, did Justice Barnard have jurisdiction to issue that injunction? The court must go into that question before an opinion on the case can be rendered.

Mr. Shepard acquiesced to the suggestion of the Court to ascertain the extent. He said that for days before the election applications for mandamisuses had been made, and it would have been fulle to have made an application for anything but an injunction. Mr. Shepard, in closing, said:

"I beg of Your Honor not to transform this case into a dilatory and proting the season with the case. It is well known he was appointed on the application of certain people interested in politics.
